

# EMIL KJÆRGAARD EYBYE

COMPUTER  
SCIENCE  
STUDENT

## / PROFILE

I'm a solution-oriented and passionate 21-year-old Computer Science student at Aarhus University. I like getting challenged to learn and work with new technology. As such in my spare time I play around with small full-stack projects - check them out at my website. I would like to become a part of a great team where both teamwork and working independently is a part of every day. I have experience with multiple programming languages, full-stack projects, database systems, etc. If you hire me, you'll get a passionate, fast learning and hardworking employee that will contribute to the existing team spirit.
